

The NIPPO CORPORATION Group obtained SBT certification in May 2025.

To achieve our fiscal year 2030 reduction targets, we will further promote existing initiatives such as improving energy efficiency and introducing renewable energy, while actively working to reduce emissions across the entire supply chain.

## TARGET DASHBOARD

The SBTi's Target Dashboard lists companies and financial institutions that have set science-based targets, or have committed to developing targets.

### Summary

10572

Total no. of companies with targets or commitments

7810

Companies with validated targets

1764

Companies with net-zero targets

2997

Companies with active commitments

### Understanding the dashboard

The dashboard shows businesses that have validated science-based targets. Target validation is carried out by SBTi Services, a wholly-owned subsidiary of the Science Based Targets Initiative. It also shows organizations that have committed to set science-based targets, as well as those that have had their commitments removed in accordance with the [SBTi Services Commitment Compliance Policy](#). The information in the dashboard is updated every Thursday, with commitment removals taking place once a month, ordinarily on the first Thursday of the month. Data from the dashboard is available to download in more detail in a [by-target](#) or [by-company](#) structure in .xls format.

**If you are unable to access the the data downloads via the above links, they are also available via these links:**

[By company](#)

Expand the key for an explanation of the information in the dashboard. You can also [download the full data dictionary](#) for a more detailed explanation, including for the information found in the data downloads.

[KEY](#)

DISCLAIMER: A validated science-based target represents an entity-specific greenhouse gas (GHG) emissions reduction target that has been validated against SBTi's public standards and assessment metrics. The SBTi does not offer any assurance that a given entity will achieve, or is on track to achieve, its validated science-based target, nor does the validation of a target implicitly endorse or recognize the means chosen by an entity to achieve said target. A validated science-based target covers only GHG reduction targets and should not be used to claim an entity is making other climate or sustainability related impacts beyond the future GHG reduction target.
